-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

- 4) ☒ Claim(s) 1-12 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-12 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_ are subject to restriction and/or election requirement.

### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

### Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
  - ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_.
  - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

1. Claims 1, 3-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Reeder (#3,627,304) in view of Hamilton.

Reeder shows two roller means 38, 40 that are driven Reeder teaches the concept of using a slip element that controls the degree of slippage between roller 38 and workpiece 13 to prevent displacement of the workpiece 13 and to also control the tension placed on the continuous workpiece as a function of the workpiece by the rollers (col 4 lines 55+). Reeder discloses the workpiece as folded, continuous documents (col 1 lines 1+). This reads on plurality of sheets. Reeder also discloses that the clutch can be adjusted to slip over a range of different torques (Col 4 lines 6+). Reeder does not show creasing rollers as claimed. However, Hamilton shows a first crease roller means and second roller disposed on first and second axles as shown in figure 2. Hamilton shows the rollers being driven by first and second gear members 76, 78. It would have been obvious to one of ordinary skill in the art at the time of the invention to provide Reeder with creasing roller means as taught by Hamilton to form creases in workpieces for folding. Examiner takes official notice that crease roller means are well known in the art. Regarding claim 5, the examiner takes official notice that it is well known in the art to use washer means as claimed.

2. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Reeder in view of Hamilton as applied to claims above, and further in view of Wakabayashi et al (#6,568,668). Reeder in view of Hamilton do not show a

Art Unit: 3721

movable blade to push a sheet through a nip as claimed. However, Wakabayashi et al show a blade 661 that pushes sheet means through a nip to form a fold. It would have been obvious to one of ordinary skill in the art at the time of the invention to provide Reeder in view of Hamilton with pushing blade means as taught by Wakabayshi et al to accurately form a fold.

3. Claims 6 -11 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Reeder. Reeder shows two roller means 38, 40 that are driven Reeder teaches the concept of using a slip element that controls the degree of slippage between roller 38 and workpiece 13 to prevent displacement of the workpiece 13 and to also control the tension placed on the continuous workpiece as a function of the workpiece by the rollers (col 4 lines 55+). Reeder discloses the workpiece as folded, continuous documents (col 1 lines 1+). This reads on plurality of sheets. Reeder also discloses that the clutch can be adjusted to slip over a range of different torques (Col 4 lines 6)+).

4. Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Reeder in view of Wakabayshi et al. Reeder does not show a movable blade to push a sheet through a nip as claimed. However, Wakabayashi et al show a blade 661 that pushes sheet means through a nip to form a fold. It would have been obvious to one of ordinary skill in the art at the time of the invention to provide Reeder with pushing blade means as taught by Wakabayshi et al to accurately form a fold.

Art Unit: 3721

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eugene L Kim whose telephone number is 571 272-4463. The examiner can normally be reached on Tuesday-Friday 8 a.m. to 6 p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rinaldi Rada can be reached on 571 272-4467. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
